# How To Play

---

## **What is Nulltime?**

Nulltime is ~~the greatest game to ever exist~~ the virtual form of the party game “Fishbowl” or “Time’s Up”.

## **What are the rules?**

Fishbowl/Time’s Up is as if charades and an office icebreaker game had a child, except fun.

- Round 1: Guess the card with as many words as you want
- Round 2: Guess the card using only one word
- Round 3: Guess the card using charades/motions and no talking

## **Why would we make such a thing?**

In ye olden days, the setup for Fishbowl was exceptionally tedious, requiring a writing utensil and many scraps of paper. Just for a game that only lasted 20 minutes! We wanted to change that.

# Features

---

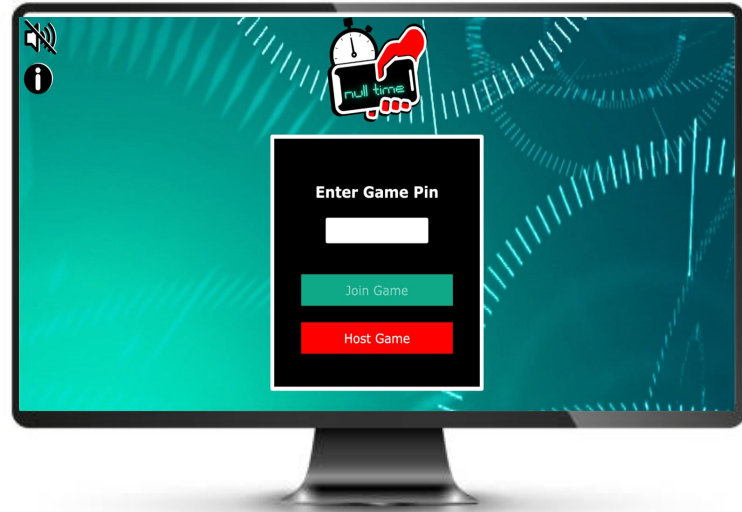

## **Benefits of Being Digital**

- Play the game without needing paper and pencil with digital cards!
- Save time by not having to write all your words down. You type them!
- It works on your phone!
- There's music and sound effects!

## **Technology**

- Angular
- Typescript
- SASS
- Node
- SQL database
- Kotlin for the backend server

**Game Over!**

A cartoon illustration of two stick figures. One stick figure, wearing a green shirt, is standing and celebrating with its arms raised and a wide smile. The other stick figure, wearing a red shirt, is lying on the ground with a sad, grumpy expression.

Team 1 Score: 10

Team 2 Score: 8
